

PELICAN QUICK-CLEAN ACCESS PANELS

Available to upgrade on existing Pelican NP model sweepers

Kit #7970434

Elgin Sweeper Company is pleased to announce the release of a new customer inspired design for the Pelican NP. Effective immediately, all Pelican NP's will have, as a standard feature, the Quick-Clean access panels; located on both LH and RH sides of the chassis. These panels require no tools to remove or hang in place on the chassis. The Quick-Clean access panels allow operators easy access for daily cleaning of the main broom, top of conveyor throat, and conveyor opening in a matter of seconds.

- ✓ **Easy to remove panels / easy to clean specified locations**
- ✓ **Easy identification of the enlarged conveyor throat**
- ✓ **Easy access to hydraulic test ports**
- ✓ **NOT TOOLS REQUIRED**
