# LIBERATOR MAX

## FEATURES

- Up to 8 full-duplex intercom positions with an unlimited number of listen-only headsets
- 8 separate talk-group channels
- Range: Up to 1,500 feet (line of sight)
- Ability to integrate portable radio into the headset allowing the user to simultaneously communicate over the portable radio and intercom
- Premium dual-speaker headset with noise reduction rating of 23dB Helps companies comply with OSHA hearing safety / conservation regulations
- Full-duplex intercom communications without any push-to-talk (PTT) required
- Available in Behind-the-Head Style
- 15 hours battery life
- Different charging options available.
- Charge anywhere with a 120VAC to 12VDC wall charger or 12VDC power supply
- Designed to extend life in demanding environments. Perfect for rugged situations
- No installation or base station required. Just turn on your headset and start talking

## PERFECT FOR THESE INDUSTRIES:

### HYDROVAC

Setcom can help improve safety and productivity for hydrovac truck operations, including daylighting, trenching, pipeline crossing, directional drilling, and potholing.

### PUBLIC WORKS

Setcom's wireless headsets offer uninterrupted, clear communication for public works applications, whether repairing a pothole on the road or reconstructing a concrete sidewalk.

### CONSTRUCTION

Setcom offers ruggedized communication solutions to meet the needs of crews operating high-noise equipment, such as excavators, backhoes, bulldozers, graders, cranes, and pavers.

### UTILITIES

Setcom's industrial communication systems provide reliable communication between utility line workers and others in aerial bucket trucks.

### WASTEWATER

Clear communication is crucial in wastewater work. Setcom's LiberatorMAX system provides hands-free communication and hearing protection, allowing your crew to focus on the job.

## Innovation & Quality

### ★ GUARANTEED RELIABILITY

When departments purchase Setcom equipment, they receive guaranteed reliability and an aggressive approach to quality

### ★ EASY INSTALLATION

There is no console mounting required, no cable runs for intercom components, and no soldering or cable crimping

### ★ NO PAIRING

Simply turn your headsets to the same channel and you can talk to the crew
