TRUVAC® HAS INTRODUCED THE NEW TRXX™

Report by Terri Rodina

TRUVAC® recently introduced the TRXX™ compact trailer vacuum excavator. This portable and versatile hydro excavation trailer is perfect for a variety of job sites and tasks. The TRXX has a simple, bi-lingual control panel and is easy as 1-2-3 with 1. Start the Engine, 2. Select Lights and 3. Engage Dig Mode. The TRUVAC TRXX wireless remote activates all functions of the excavator. One of the neatest features is the 'Dig and Unclog' function. It allows you to unclog the hose without having to walk to the back of the trailer.

CAPABILITIES

- Hydro Excavation
- Vacuum Excavation
- Potholing/Daylighting to locate underground utilities
- Keyholing for HDD installations
- Slot Trenching
- Cleanup of floodwater, drilling spoils, catch basins, construction sites
- Valve box repairs
- Removal of non-hazardous liquids

FEATURES

- 600 - 1,000 cfm blower
- 49-64 hp diesel Kubota engine
- Easy 1-2-3 operation
- Easy to maintain
- Easy access to key operating components
- Standard wireless remote with multi functions
- Wireless remote includes "Dig and Unclog" function

#3 Add on CPI Roller Skid

- For 6" to 18" (152 mm to 457mm) pipelines
- Keeps camera centered
- Increases range of inspection
- Extends the life of the camera

NEW KEY PUSH CAMERA KIT PURCHASE

BY TERRI RODINA

The Town of Caddo, Oklahoma purchased our new Key Push Camera Kit recently. The bundle includes an Envirosight Verisight Pro+ 330 foot push camera, Key-512 Hz locator, roller skid, and wheel extensions to help transport the unit. They were also able to purchase parts and KEG nozzles for their jetter and will be putting this equipment to hard work very soon. Key Equipment and Quality Rents would like to thank the Town of Caddo, Dwight Gould, and his crew for this purchase!

"Our Envirosight (Key) Push Camera Kit allows you to find and locate issues in your sanitary system quickly and accurately,"
 Josh Pandian, Oklahoma Territory Manager for Key Equipment and Quality Rents, explains.
