

ENVIROSIGHT VSP+ & KEI KART™

FEBRUARY 1, 2023

PRESS RELEASE

Key Equipment & Supply Co.® has acquired the patent and the manufacturing rights for the KEI Kart™ attachment for the Envirosight Verisight Pro+ push camera. The KEI Kart adds value and stabilization for the top-heavy VSP unit at a small price.

Key Equipment sells 90% of all our VSP units with the KEI wheels, creating great success as a package. Our team demonstrates these units with every VSP that we show our customers. We have also packaged these with a locator, KEI Kart, and a large-diameter skid for a complete add-on package to increase production for our customers. These packages offer great value and complete a total package offering for our customers.

We have sold these units for many years through our Territory Managers, PSSRs, website, and our in-house Parts Department. Key Equipment is proud to distribute these through our network of Sales Partners across the US, Canada, and SA.
