VersaBinz — Front-Mounted Residential Cart System

Turn Your Front Loader into an Automated Cart Solution

VersaBinz™ is LabriePlus's front-mounted cart system for commercial front loader fleets. Built to integrate on proven front loader platforms, VersaBinz delivers a ready-to-work residential cart collection package—helping your team add cart routes without compromising everyday commercial performance.

Built for Residential Routes – With Fleet Flexibility

VersaBinz lets your front loaders handle high-volume cart routes without changing how the truck works. It turns a commercial front loader into an automated cart machine during peaks, then can be removed or moved to another truck as routes evolve.*

WHERE VERSABINZ FITS

- Residential streets with standardized roll-out carts
- Mixed commercial / residential or seasonal programs

VersaBinz boosts stops-per-hour by combining automated arm, a quick dump cycle and the large capacity of a front loader body. The driver stays in the cab—no manual lifting at the curb—while carts are managed directly in front of the truck for excellent visibility. Also available integrated with Wittke™ Starlight and Wittke™ Superduty models.

* With hydraulic provision installed on the body

ENGINEERED FOR STRENGTH, SIMPLICITY & SERVICEABILITY

VersaBinz uses a robust lever-and-pivot gripper and a Helping-Hand™-inspired S-Boom to stand up to repetitive loading. Hydraulics are kept clean and accessible so technicians can keep trucks working with less effort.

- Integrated hydraulic valve block reduces hoses and leak points
- Automatic hydraulic lock secures arm and bin when stowed near the hopper
- Sacrificial hook helps protect the main structure in extreme misuse
- Standard lighting integration and shared LabriePlus™ components simplify parts and service

Integrated hydraulic valve block

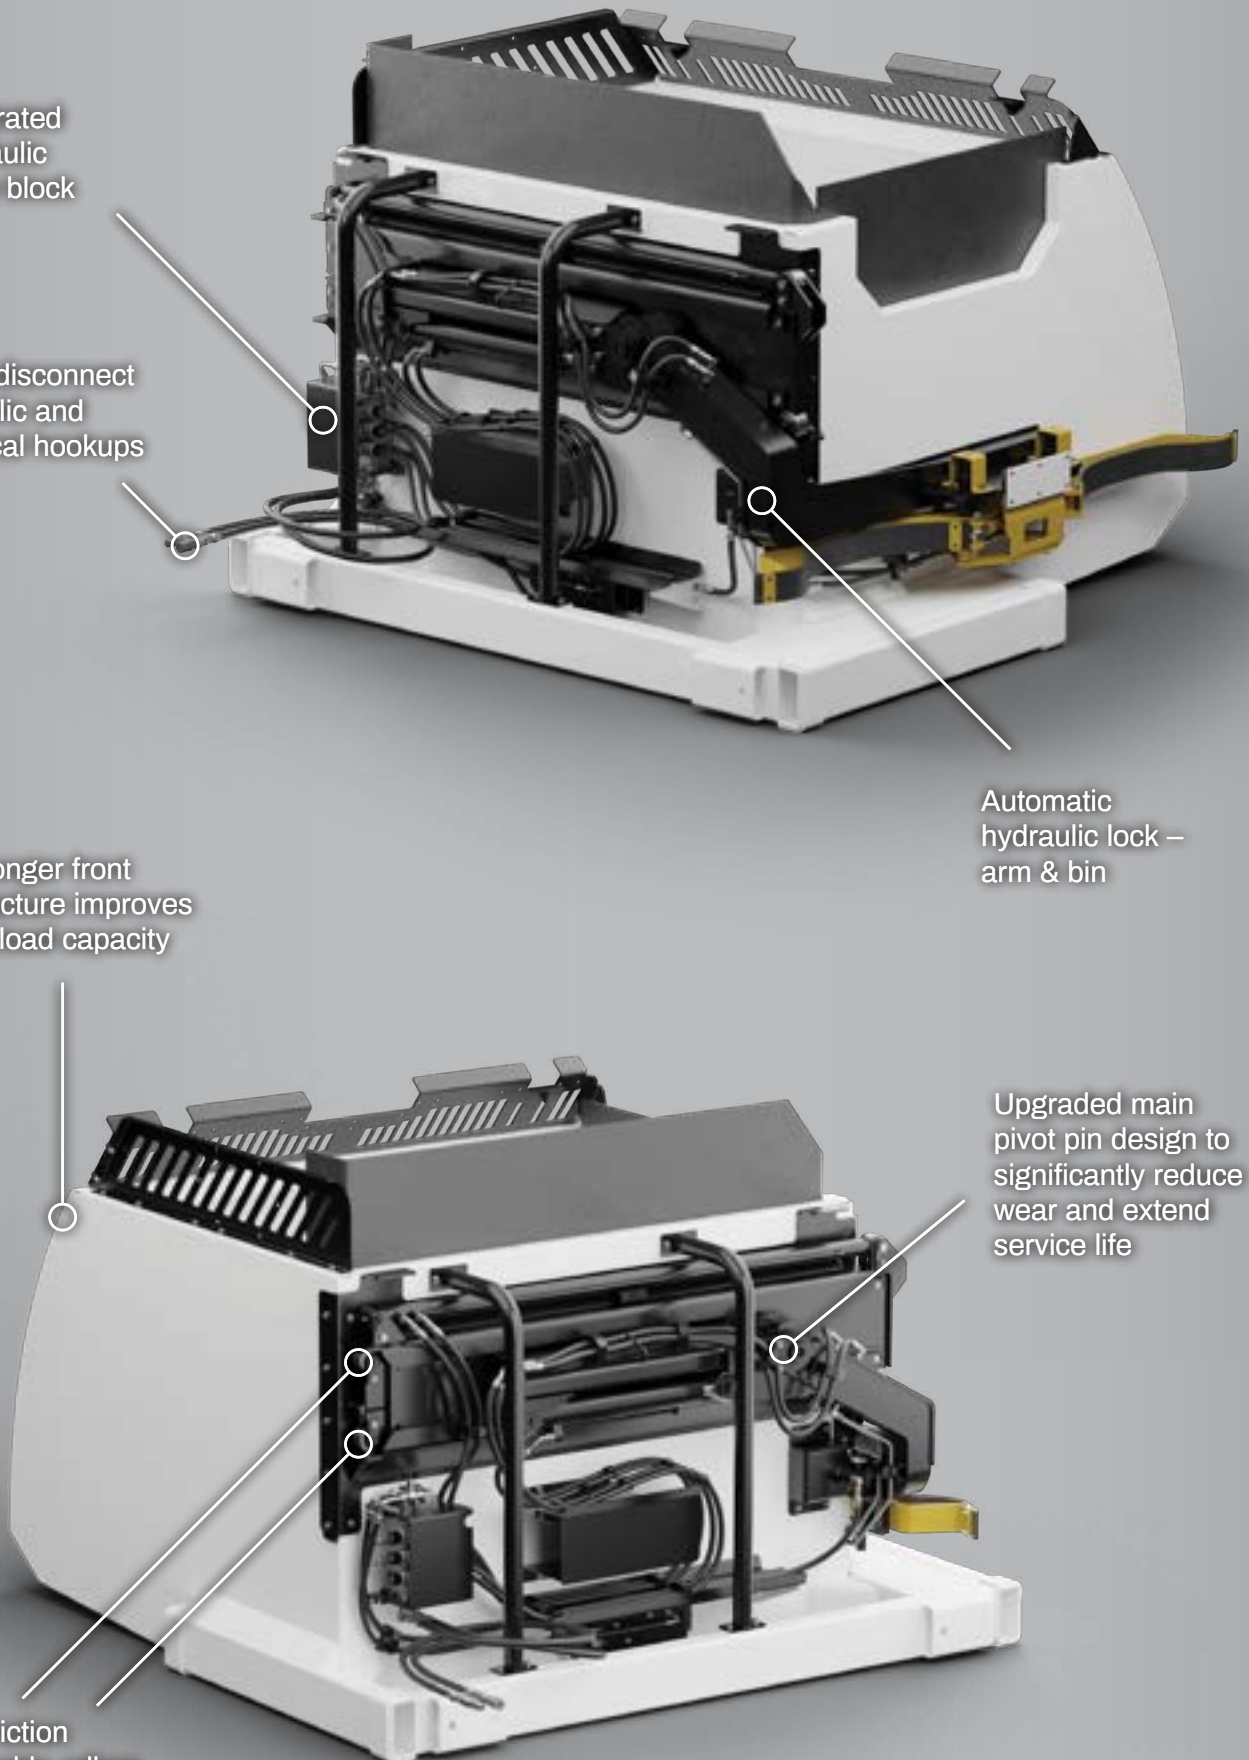

Quick-disconnect hydraulic and electrical hookups

Automatic hydraulic lock – arm & bin

Stronger front structure improves payload capacity

Upgraded main pivot pin design to significantly reduce wear and extend service life

Low-friction adjustable rollers
