

Spin Doctor

HH500 VALVE EXERCISER

The HH500 handheld valve exerciser offers quick, efficient access to valves and hydrants in hard-to-reach areas. Its cordless, rechargeable design ensures portability, making it ideal for emergency situations. This tool requires minimal manpower to open or close valves, providing reliability and convenience during critical scenarios.

HH500

VALVE EXERCISER

The Spin Doctor® HH500 is a lightweight, cordless, and user-friendly tool that provides up to 500 ft. pounds of torque, making it perfect for managing your fire hydrant and small valve inventory. If you're looking for a tool that you can easily pick up and take with you, the Spin Doctor® HH500 is the ideal choice.

- Quick Operation
- Cordless, Hose-free, and Wire-free
- Durable Motor, Gearbox, and Battery
- Lightweight at 23 lbs
- Minimal Maintenance Required
- Rapid Charging Time of 30-40 Minutes

The Spin Doctor® HH500 is designed to operate at a safe and constant speed utilizing a hand-operated throttle control. With a rechargeable 18-volt Lithium-Ion battery, you will have all the power you need to finish the job.
