

HIGHER FLOW. HIGHER POWER.

Harben ET-180 High-Flow Trailer Jetter

► Industrial Demand Made Easy

High-Flow output keeps large municipal jobs moving fast—less downtime, cleaner runs, and confidence on high demand projects.

► Real Support, Nationwide

Hands-on help, honest answers, delivered straight from a team that stands behind every Harben out there—backed for two full years, and by a culture that says, “Harbens don’t quit. And neither do we.”

► More Jobs, Less Downtime

300-hour service intervals. No blown seals, pumps stay protected. Keep your revenue rolling and your backlog shrinking.

► Diverse Applications

Ideal for mainline and municipal cleaning, heavy sand/sludge removal, grease-heavy lines, and long-run jetting — from municipal water systems and industrial farming to residential plumbing, prisons, and other large facilities.

BUILT TO OUTLAST. READY WHEN YOU ARE.

Harben ET-180 HF Trailer Jetter

Maximum output, minimum interruptions.
For pros who run all day.

► Purpose-Built for Sewer & Drain

Engineered for big-volume cleaning — not a pressure unit trying to act like one. Harben's radial piston diaphragm Run-Dry pump is made for real sewer and drain work, delivering the kind of steady flow that clears lines fast and keeps debris moving out. No compromises, no afterthought design.

► No-Excuse Reliability

Still running strong after decades in the field. You get unwavering output up to 4,000 PSI / 25 GPM — the high flow that scours mains, washes sand and sludge, and finishes jobs in fewer passes. With our best-in-class Run-Dry pump and cold-ready antifreeze system, your ET-180 HF is always ready, regardless of weather.

► Made For the Long Haul

Built right here in the USA, covered by a tough-as-nails warranty, and supported by a team that answers the phone when you call.

"It's unstoppable! We've had our Harben jetter for 22 years, and it's unstoppable. The staff have offered great support every time."

— Matthew Zurn, Zurn Plumbing
